Aurum Equity LLC

Federal Software Modernization

UEI H2PBRHL3GT65 | NAICS 541511, 541512, 541519 | CAGE 18U14

Woman-Owned Small Business | SBA WOSB certification pending | SAM.gov active | Birmingham, Alabama

Aurum Equity LLC provides compliance-ready modernization for federal agencies and prime contractors. We modernize legacy systems and deliver them audit-ready through documentation-driven delivery, with direct access to our lead engineer.

CORE COMPETENCIES

- Application development and system enhancement
- Systems integration and interoperability
- IT modernization and legacy transition
- Cloud environment and infrastructure support
- Technical implementation and project coordination

SERVICE CAPABILITIES - TECHNOLOGY

- Application maintenance and production support
- API integration and system connectivity
- Performance optimization and troubleshooting
- Legacy-system transition assistance
- Monitoring, testing, and operational technical support

SERVICE CAPABILITIES - RECORDS

- Compliance-based records retention scheduling (NARA, FAR 4.703, DFARS)
- Controlled document lifecycle management and disposition
- Federal records classification and access-control support
- Audit-ready recordkeeping aligned to retention requirements

DIFFERENTIATORS

- Senior-engineer-led delivery with direct access to our lead engineer
- Experience supporting enterprise-scale customer-facing systems
- Compliance-first, documentation-driven delivery
- Small, fixed-scope starter offers that lower buyer risk

STARTER OFFERS

Legacy Application Assessment	Fixed price. Current-state review, risk findings, and a modernization roadmap.
ATO and Security Documentation Readiness Review	Fixed price. Gap analysis against authorization documentation needs.
Technical Surge Support	Time and materials. A senior engineer embedded with your program team.

KEY PERSONNEL EXPERIENCE

ENTERPRISE E-COMMERCE AND MODERNIZATION

Supported a high-volume, customer-facing enterprise platform. Work included application support, GCP services, Datadog monitoring, production and security-incident investigation, vulnerability analysis, Cypress automation, and Angular-to-React modernization.

ENTERPRISE SYSTEMS, INTEGRATION AND DELIVERY

Delivered applications across transportation, media, telecommunications, logistics, retail, and financial-services environments. Representative work includes analytics consolidation, authentication and access controls, CI/CD, production support, customer buyflow stabilization, and distributed-team leadership.

Key personnel experience was performed by our lead engineer at prior organizations and not under Aurum Equity LLC contracts.
